# 1 kW solar energy cost

## Overview

---

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or smaller system. How much does a 1kW Solar System cost?

The surplus energy can be fed back into the grid, earning you a 20% return on your investment per year based on current electricity costs. The typical cost of a 1kW solar system is around \$2,000. However, it's important to note that the prices of solar panels have come down substantially over the past 10 years.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a 5kw Solar System cost?

According to the National Renewable Energy Laboratory (NREL), a typical U.S. household installs a 5kW solar system. The solar panel cost is a portion of the total price you have to pay for installing solar panels. At the current average cost of \$2.71 per Watt, a typical 5kW system will cost you \$13,550.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt.<sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

Can a 1kW solar system save you money?

One of the major advantages of installing a 1kW solar system is the potential for long-term savings on electricity bills. On average, a 1kW solar system can save homeowners up to \$310 per year. Over the 25-year lifespan of the solar panels, this translates to a total savings of \$7,756. If playback doesn't begin shortly, try restarting your device.
