

# **100kwh liquid-cooled energy storage**

## Overview

---

What is a 100kw/230kwh liquid cooling energy storage system?

The 100kW/230kWh liquid cooling energy storage system was independently designed and developed by EVB. It is widely used in the energy storage field with grid-tied and off-grid inverters. High specific heat liquid cooling technology. Modular “All-In-One” integrated single cabinet design.

What is a liquid cooling energy storage system?

The 100kW/230kWh liquid cooling energy storage system adopts an “All-In-One” design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, air conditioning, energy management, and more into a single unit, making it adaptable to various scenarios.

What is the icon 100kW 215kwh battery storage system?

The iCON 100kW 215kWh Battery Storage System is a fully integrated, on or off grid battery solution that has liquid cooled battery storage (215kWh), inverter (100kW), temperature control and fire safety system all housed within a single outdoor rated IP55 cabinet.

What is a commercial & industrial energy storage system?

The commercial & Industrial energy storage system integrates batteries, battery management system, energy management system, modular power conversion system and fire protection system. ISEMI provides the air cooling and liquid cooling types.
