

A white and black portable power station with a handle. The front panel features a digital display showing battery level and time, a light indicator, and several output ports including DC 12V, USB 5V, USB 5V, DC 18W, and Type-C. There is also an AC output port and a speaker grille on the side.

Increasing power and torque capability of brushless direct current

In this experimental study, it is aimed to design and manufacture a versatile VSI which can control the BLDC motor in both 120 and 150-degree conduction modes.

Simulation and Analysis of 150° Conduction Mode For Three ...

For 150° mode, each thyristor conducts for 150° of a cycle in voltage source inverter (VSI). For completing one cycle of the output ac voltage unlike 180° mode & 120° mode inverter, 150° ...
