

# 1kW household solar all-in-one machine

Solar Panel

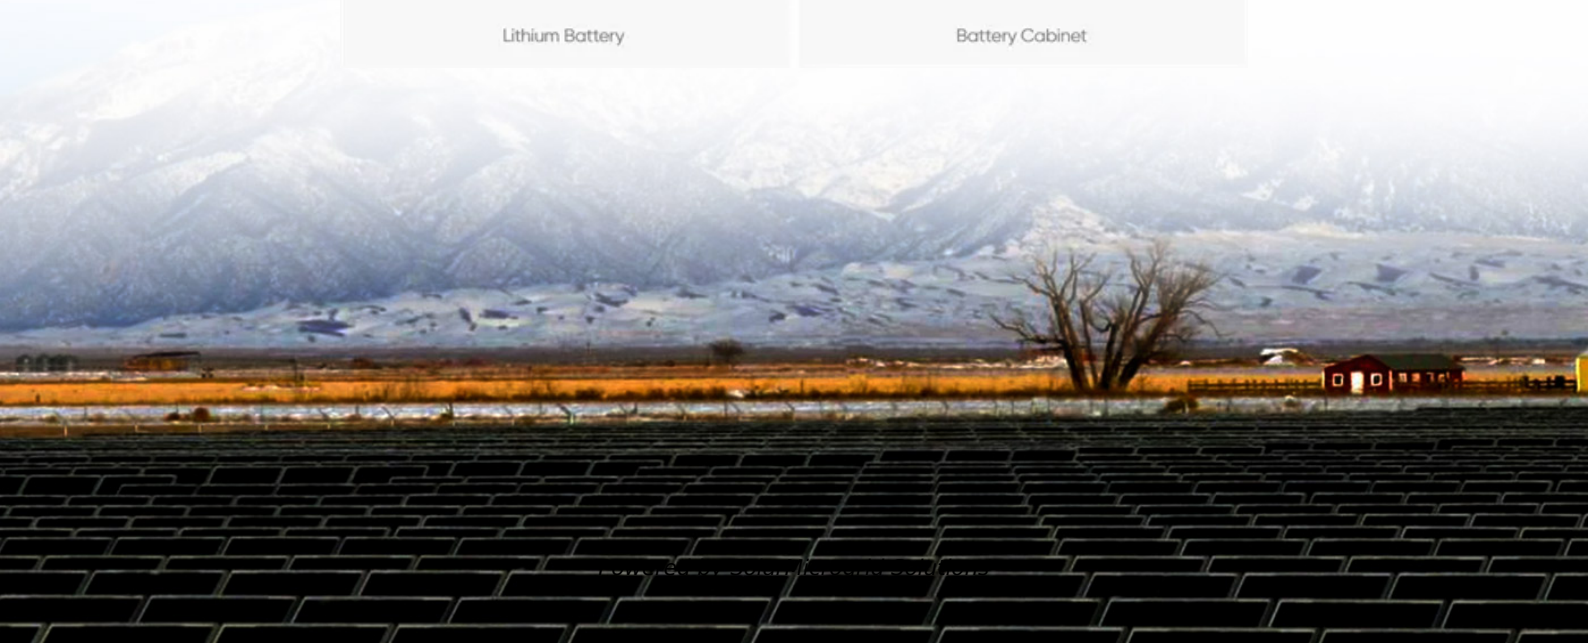

Hybrid Inverter

Lithium Battery

Battery Cabinet

## Overview

---

What is a portable solar generator?

This is a powerful & portable solar generator to power your 220VAC or 110VAC and 12VDC home appliances at the same time. All-in-one with inverter MPPT solar controller and battery, ensure you easy installation and simple operation. All you need to do is connecting it with solar panel to enjoy free electricity.

How many Watts Does a solar inverter need?

Because the idle consumption is high on these all-in-ones, you will need at least 400 watts of solar panels attached to your system to offset the loss. If you do not plan to have your inverter on 24/7, this is not a problem. Some models have a lower solar panel array input voltage (usually 60-148VDC).

Are DIY solar panels UL certified?

Connect some batteries and solar panels, change the settings, and you are done. The DIY battery community has used these units 24/7 for years! They are extremely dependable. As of 2021, they are now UL certified! This means that the components inside the units are high quality.

How long does a solar inverter last?

A: Yes, 18 months for inverter and inverter-related products including solar generator, solar inverter. 2 years for solar lights. Q4: Can you do OEM/ODM?

A: Yes, we accept OEM/ODM orders for inverter, solar inverter, MPPT solar controllers, solar generator and solar lights. Please send you detailed request to our sales specialist for best quote.
