

28W solar panel with battery

Overview

Is the solarpowa 28 a good solar panel?

The SolarPowa 28 is a reliable and easy-to-use portable solar panel. The SolarPowa 28 performed exceptionally well in direct solar charging tests, outdoing the other solar panels with its four strong solar panels linked together. This panel is extremely effective at converting direct sunlight into energy.

Does BigBlue solarpowa 28 have a battery?

The BigBlue SolarPowa 28 is a 24-watt monocrystalline folding solar panel that weighs 20.9 ounces and measures 31 inches in length, 11.5 inches in height, and 0.2 inches in thickness when fully opened. It does not have an integrated battery, but it does have three USB ports, each of which outputs 2.4 amps.

Does solarpowa 28 have a USB port?

The SolarPowa 28 is equipped with three USB ports and offers all the charging capacity that one could need while outside. However, it lacks DC charging, so plugging in your laptop or larger device won't work very well.

How many Watts Does a solarpowa solar panel produce?

At 28 watts, the SolarPowa 28 is a middle-of-the-road panel in terms of wattage. Still, it consistently generated the most milliamp hours of power in one hour during direct solar testing. It has four panels, permanently linked, that each deliver seven watts for a combined total of 28 watts.

Does solarpowa 28 have an ammeter?

The previous version, the BigBlue 3, came with an ammeter to monitor power output. The SolarPowa 28 is available both with and without an ammeter, allowing you to choose if you want to carry the extra bulk or not. We tested the version without the ammeter and with 3 USB-A ports.

How many USB ports does a BigBlue solarpowa 28 have?

The version readily available in the US now features one USB-A port and two USB-C ports. The BigBlue SolarPowa 28 is a 24-watt monocrystalline folding solar panel that weighs 20.9 ounces and measures 31 inches in length, 11.5 inches in height, and 0.2 inches in thickness when fully opened.
