

2GWh of large-scale energy storage in West Africa

Overview

Are energy storage boom times extending to Africa?

Boom times for energy storage have extended to the continent of Africa, with a 10-fold increase in installed storage supporting grids and renewable energy penetration.

How many GWh of storage projects are being built in Africa?

AFSIA said similar projects have also been launched in Senegal, Malawi, Botswana, Tanzania, Namibia and Mauritius, for a total of 500 MW plus. In total, AFSIA says around 18GWh of storage projects are under development across Africa. Tristan is an Electrical Engineer with experience in consulting and public sector works in plant procurement.

Where in West Africa is the biggest power generation project?

There are significant power generation projects planned or underway in most parts of West Africa, with regional economic heavyweight Nigeria the most active market and also home to the biggest scheme: the 3GW Mambilla hydroelectric plant.

How is West African energy transforming?

The West African energy sector is transforming rapidly with the deployment of large-scale renewable energy capacities, including four 150 megawatt (MW) regional solar parks in Burkina Faso, The Gambia, Mali and Niger. These projects, supported by the World Bank, are part of the ECOWAS Master Plan and aim to achieve a cumulative capacity of 600 MW.

What is the energy storage capacity of the Ingula PSS?

Straddling the border of South Africa's KwaZulu-Natal and Free State provinces, the Ingula PSS has an energy storage capacity of 21 GWh, or 15.8 electricity generating hours.

What is the West Africa Energy Program?

The West Africa Energy Program run by US AID's Power Africa division includes support for five solar projects which will provide about 150MW of electricity, including the Kodení and Nagréongo solar plants in Burkina Faso and a 250MW solar / hydropower hybrid plant in Ghana.
