

# **325kw photovoltaic inverter**

## Overview

---

What is the most powerful string inverter?

Chinese inverter manufacturer Sungrow has launched a new string inverter with a power output of 325 kW, which it claims is the most powerful string inverter ever launched on the market to date. The device measures 1,100 x 890 x 360mm and weighs 110 kg. It offers a reported efficiency of 99.01%, for a European rating of 98.52%.

What is a utility-scale inverter?

Designed for durability, the utility-scale inverter supports operation at altitudes up to 5000 meters and is protected by an IP66-rated enclosure. An automatic tripping switch further enhances safety in harsh outdoor conditions. Max. PV input power per MPPT.

Are multi-MPPT string inverters safe?

Guess you want to find it. Multi-mppt string inverters from Sungrow, sg350hx, are proven safe for 24h real-time AC and DC insulation monitoring and reach a high yield of 99% at a low cost.

How many MPPTs does a Solis inverter have?

Solis' largest three-phase, 1500 VDC PV string inverter has 12 MPPT (250, 300 and 350) or 16 independent MPPTs (350K) options that allow for great redundancy in larger systems. Redundancy through a distributed method supports overall system uptime.
