

# 48V solar photovoltaic panel output voltage

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

## Overview

---

While the nominal voltage stands at 48 volts, the actual voltage experienced in operation typically lies in the range of 60V to 65V during peak conditions. This higher output is due to variables such as solar radiation intensity, temperature effects, and the inherent efficiency of solar cells.
