

Albania adds new power base station

Overview

How many power stations are there in Albania?

This article lists the main power stations in Albania. There were 144 active power stations operating in the country in 2016. The table below lists only stations that have at least 10 MW of power capacity. As of 2022, there were 16 solar projects totaling 570 MW planned in Albania. ^ Spasić, Vladimir (2022-01-17).

Will Albania build a future electricity interconnection with North Macedonia?

Albania marked the start of construction of its section of the future electricity interconnection with North Macedonia. The project for the link between Fier to Bitola is worth just over EUR 70 million on its side. Albania and North Macedonia are working on their first overhead 400 kV power line, which would enable market coupling and direct trade.

What is the high-voltage power link between Albania and North Macedonia?

The high-voltage power link between Albania and North Macedonia will be part of an energy corridor from Bulgaria toward Italy OST hired Joint Venture Mitas Energy and Doko as the contractor for the high-voltage link almost three years ago. It signed a deal with Greece-based Mytilineos for the substations in April 2021.

How does the new energy transmission line help Albania?

The new transmission line aids the transition to clean energy, facilitating renewable energy transmission within and beyond Albania. The EU is providing to Albania overall more than €125 million grants support for various energy programmes, all geared towards the energy transition.

What is the first high-voltage transmission line between Albania and North Macedonia?

Construction of the first element of the high-voltage transmission line between

Albania and North Macedonia has started today. The 400 kV line will be the first electric interconnection between Albania and North Macedonia and will enable direct electricity exchanges between both power systems.

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.
