

## Overview

---

How many power stations are there in Albania?

This article lists the main power stations in Albania. There were 144 active power stations operating in the country in 2016. The table below lists only stations that have at least 10 MW of power capacity. As of 2022, there were 16 solar projects totaling 570 MW planned in Albania. ^ Spasić, Vladimir (2022-01-17).

How much energy does Albania need to save?

According to these, Albania needs to achieve a 52 per cent share of renewables in gross final consumption of energy. To boost energy efficiency and energy savings, it also needs to cap primary energy consumption at 2.6 Mtoe and final energy consumption at 2.4 Mtoe by 2030.

Does Albania have a power supply security problem?

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.

Does Albania have a hydro power plant?

Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few years because of new private investments in hydro power plants and more recently in small solar farms.

Does Albania have a national energy and Climate Plan?

Albania adopted a National Energy and Climate Plan in December 2021, but as a result of the 2030 targets and comments from the Energy Community Secretariat, it needs to be updated. As of January 2025, a draft of the new Plan is undergoing public consultation.

## Is Albania connected to International Gas Networks?

Albania is not connected to international gas networks at the moment, though the controversial Trans-Adriatic Pipeline has been built on its territory. The country produces a small amount of gas, mostly used in oil production and the refining industry. It also has an outdated pipeline network of 498 km, which is mostly not operational.
