

Algeria adds new power base station

Overview

Which power plants are being built in Algeria?

Combined Cycle Power Plants: Biskra and Bellara Algeria's electricity generation capacity is set to grow with the construction of two major combined cycle power plants: Biskra and Bellara. Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW.

When will Algeria's solar power plant be completed?

With completion expected by late-2025 or early-2026, the plant is set to support Algeria's energy grid with a capacity of 362 MW. In the same month, China State Construction Engineering Corporation began construction of a 300 MW solar power plant in Ouargla Province, as well as a 200 MW solar power plant in El M'Ghair.

How many MW does Algeria's new power plant generate?

Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW. Both projects are expected to start operations in 2025 and are expected to enhance Algeria's power generation infrastructure while supporting energy security and fuelling the country's economic growth.

What are Algeria's key energy projects in 2025?

Algeria is advancing several key energy projects in 2025, aimed at increasing natural gas production, expanding electricity generation and enhancing renewable energy capacity.

How many megawatts a photovoltaic system will be built in Algeria?

The two photovoltaic projects have a capacity of 220 megawatts and 150 megawatts, respectively, and will be constructed by POWERCHINA using an EPC model. The two projects are parts of the 15 gigawatts photovoltaic network planned and constructed for Algeria by 2035.

How many projects has powerchina done in Algeria?

They are significant milestones for the development of Algeria's new energy industry. Over these years, POWERCHINA has undertaken a total of 26 projects in Algeria, covering a wide range of areas including dams, irrigation, municipal infrastructure, civil engineering, grain storage, and new energy.
