

# **Angola communication base station wind and solar complementary construction plan**

## Overview

---

What are the options for power generation in Angola?

Angola has numerous options for the generation of power. The present document considers the key options - hydro, thermal and new renewable- individually and combined in scenarios that meet the required levels of safety and redundancy.

What is the power sector in Angola?

Revised in May 2023, this map provides a detailed view of the power sector in Angola. The locations of power generation facilities that are operating, under construction or planned are shown by type - including liquid fuels, gas and liquid fuels, natural gas, hybrid, hydroelectricity, solar PV, wind and biomass/biogas.

Can Angola produce electricity from mini-hydro power stations?

Furthermore, Angola's Ministry of Energy and Water has identified nearly 100 locations to produce up to 600 MW of renewable electricity from mini-hydro power stations - which will each have a capacity of less than 10 MW - throughout the country's vast river network.

How did the AfDB support Angola's energy sector reforms?

The AfDB jointly with JICA supported the Government with US\$ 1.2 billion through its Power Sector Reform Support Program to support the energy sector reforms undertaken by Angola between 2014 and 2017. Order no. 11/17: to review and extend the Angola's National Vision of 2025 to 2050.

Does Angola have a long-term plan for renewables?

The Angolan Government has an ambitious Action Plan for the period up to 2025 with around US \$18 billion worth of investments into renewables underway, and it has a long-term vision for the power sector with a clear roadmap to provide modern electricity services to 60% of the population by

2025.

How many solar villages will be installed in Angola?

anticipated that, in accordance with the Strategy for New Renewable Energies, 500 “solar villages” will be installed in off-grid main villages and in other settlements of larger dimension and, for the remaining population, individual systems based on solar energy will be supplied. Angola has numerous options for the generation of power.
