

Are there any battery cabinet manufacturers in Switzerland

Overview

Why should you choose Swiss clean battery?

The high standardization of factory construction promotes economies of scale and rapid implementation, so that the total capacity of 7.6 gigawatt hours will be reached in just a few years. When building the factory and equipping it with the necessary production facilities, Swiss Clean Battery draws on established and renowned partners.

Who makes Renata Batteries?

Founded in 1952 as a producer of mechanical watch parts, RENATA was transformed into a specialised button cell maker in the late Seventies. Today, the Itingen plant produces more than 1 million micro batteries every day. Thanks to a high degree of verticalization, RENATA is reputed as an extremely flexible and reliable battery source.

How many gigawatts a year will a battery factory deliver?

In the future, the factory is expected to deliver 7.6 gigawatt hours annually with 47.5 million batteries. There are already concrete plans for other European countries to acquire appropriate licenses and open up locations — for example in Germany, Austria or Spain. The installation of home or industrial storage systems requires careful planning.

Are there any battery cabinet manufacturers in Switzerland
