

# **Are there any weight requirements for outdoor power supplies**

## Overview

---

What is an external power supply?

Sign up for email updates on regulations for this and other products As defined in the Code of Federal Regulations (CFR), "external power supply" means an external power supply circuit that is used to convert household electric current into DC current or lower-voltage AC current to operate a consumer product.

How many external power supplies are there in the EU?

In 2020, 1.7 billion external power supplies (EPS) were in use in the EU27, of which 75% for residential use, on average 6.5 units per EU household. They converted 48 TWh/a of electricity from the 220V mains to the input needed by the powered products.

Do manufacturers have to comply with energy conservation standards?

Manufacturers have been required to comply with the U.S. Department of Energy (DOE) energy conservation standards for external power supplies since 2007.

What is the external power supplies test procedure rulemaking docket eere-2014-bt-tp-0043?

The external power supplies test procedure rulemaking docket EERE-2014-BT-TP-0043 contains all notices, public comments, public meeting transcripts, and supporting documents pertaining to this rulemaking. There is no public meeting scheduled at this time. The comment period is closed.

How much money will EU27 users save on external power supplies?

In 2020, due to Ecodesign measures, EU27 users saved € 0.9 billion on external power supplies. This is projected to increase to € 1.3 billion in 2030, a 16% saving. In 2030, the annual household expenses for EPS are projected to decrease from € 33 (without measures) to € 28.

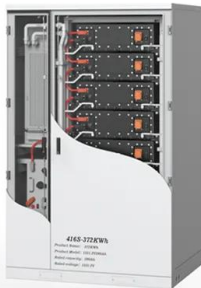

What is no-load power consumption?

No-load power consumption is the power consumed when this is plugged into a power outlet but not connected to a device. Voltage converters, uninterruptible power supplies, battery chargers, halogen lighting converters and external power supplies for medical devices are excluded from these requirements.

## Are there any weight requirements for outdoor power supplies
