

Argentina s new solar power home device

100-430KWH

230|400V

Overview

How will a new solar plant benefit Argentinians?

With a new expansion, it will be able to provide electricity to 260,000 homes while also creating new jobs for local Argentinians. The Cauchari Solar Plant is just the start for Argentina, which is starting to really shift to using more renewable energy sources.

What's going on with solar in Argentina?

CREDIT: Cauchari Solar BUENOS AIRES, Dec 10 2020 (IPS) - The unprecedented growth of renewable energies in Argentina over the last three years has borne its greatest fruit: the Cauchari solar park, with nearly one million photovoltaic panels and 300 MW of installed power, which was connected to the national power grid on Sept. 26.

Does Argentina produce a lot of energy from PV?

Despite the success of this project, and the fact that Argentina is considered an ideal location for PV development, the country produces almost none of its energy from PV. The energy mix from 2019 showed that Argentina used 89% fossil fuels, 3.9% hydroelectric, 2.8% nuclear, and the remaining encompassed all other sources of energy creation.

How many solar panels are there in Argentina?

In 2019, this project was inaugurated with over 1,000,000 solar panels generating power for 160,000 homes. At its onset, the project consisted of three individual PV fields, the Caurachi I, II, and III. With a new expansion, it will be able to provide electricity to 260,000 homes while also creating new jobs for local Argentinians.

How much does a solar project cost in Argentina?

The electricity from the Cauchari solar project will be sold to Argentina's electricity wholesale market administrator Compañía Administradora del

Mercado Mayorista Eléctrico (CAMMESA) at a price of £46 per MWh under a 20-year power purchase agreement (PPA).

How much energy does Argentina use?

The energy mix from 2019 showed that Argentina used 89% fossil fuels, 3.9% hydroelectric, 2.8% nuclear, and the remaining encompassed all other sources of energy creation. For a country that was ranked 18th in PV position by Ernst and Young's Renewable Energy Country Attractiveness Index, this is shocking.
