

Armenia Offshore Wind Power Energy Storage Project

Overview

How much wind power does Armenia have?

A 2003 study by the U.S. Department of Energy's National Renewable Energy Laboratory (NREL) estimated Armenia's land areas with "good-to-excellent" wind resource potential to be around 1,000 km². With a conservative assumption of 5 MW per km², the authors noted that the area could support almost 5,000 MW of potential installed capacity.

How many wind farms are there in Armenia?

Armenia's wind energy sector is minuscule. The entire country has just four wind farms with an installed capacity of 4.23 MW and an average annual generation of 3.97 GWh.

Does Armenia have a hydropower potential?

Most of Armenia's hydropower potential is already tapped, but there remains some significant unrealized potential. In its long-term strategy, the Armenian government stated its goal to attract \$100 million to tap the additional small hydro potential, increasing its overall capacity from 380 to 430 MW.

Is geothermal energy viable in Armenia?

The geothermal energy potential of Armenia is significant, but is not considered economically viable, at least for now. The World Bank has estimated the total potential at around 150 MW. The Karkar site in Syunik, for instance, has an estimated capacity of 28 MW with a construction cost of nearly \$100 million, far pricier than solar.

How big is Armenia's solar power?

In 2017, Tamara Babayan, a sustainable energy expert, estimated the potential of Armenia's distributed solar power at 1,280 MW and almost 1,800 GWh in annual generation.

What is Armenia's long-term energy strategy?

In its long-term strategy (up to 2040) for the energy sector, adopted in January 2021, the Armenian government identified the maximum utilization of renewable energy potential as a priority.

Armenia Offshore Wind Power Energy Storage Project

The \$1bn battery: record-sized plant will store North Sea wind power

2 days ago · Work will start on the world's most powerful battery to store wind and other renewables after its developer secured more than \$1bn of debt and equity funding. The Thorpe ...
