

Australia s household energy storage scale

Overview

Australia's current storage capacity is 3GW, this is inclusive of batteries, VPPs and pumped hydro. Current forecasts by AEMO show Australia will need at least 22GW by 2030 – a more than 700 per cent increase in capacity in the next six years. How many battery energy storage systems are there in Australia?

A record 57,000 residential battery energy storage systems, with a combined capacity of 656 MWh, were installed in Australian homes in 2023, up 21% on the previous year. About 250,000 Australian homes, totaling 2,770 MWh, now have battery systems.

How many MWh of energy storage was installed in Australia in 2023?

This capacity was increased by a record-breaking level of installations in businesses – 402 MWh, on top of which, grid- scale projects, publicly known as big batteries, totalled a record 1,410MWh of capacity installed. All together, a record total of 2,468 MWh of energy storage capacity was deployed in Australia in 2023.

What is Australia's current storage capacity?

The current climate Australia's current storage capacity is 3GW, this is inclusive of batteries, VPPs and pumped hydro. Current forecasts by AEMO show Australia will need at least 22GW by 2030 – a more than 700 per cent increase in capacity in the next six years.

How many Australian homes have battery systems?

About 250,000 Australian homes, totaling 2,770 MWh, now have battery systems. The ratio of battery installations to solar installations was also up in 2023, climbing to 17%, with one energy storage system installed for every six rooftop PV systems, up 15% on 2022.

Does Australia's residential battery storage market have a rapid rise?

A new report charts Australia's rapid rise in residential battery storage adoption. SunWiz, a market research firm covering Australia's solar photovoltaic (PV) and storage markets, recently released its annual Australian Battery Market Report charting record growth in residential battery energy storage systems (BESS).

How many home storage systems will be installed in Australia?

It predicts that about 70,000 home storage systems will be installed over the 12 month period totalling about 788MWh. The addition of community battery—or 'neighbourhood battery' projects around Australia, classified within the C&I segment—will help drive a 50% growth in C&I installs.
