

Australian power generation container

Overview

What is a containerised generator?

The containerised generators are suited for mining and construction applications and have comprehensive back-up sales, parts and service support through the PR Power Australia wide network. Not sure what you're looking for?

PR Power's premium range of containerised generators are powered by genuine Perkins & Cummins diesel engines.

How much energy does a containerized generator consume?

It consumes 182.2 L/h at 75% load (50Hz) and 189.8 L/h at 75% load (60Hz), making it one of the most competitive in terms of operation and maintenance costs. The inclusion of a variable speed remote cooling system also contributes to energy consumption optimization. What features enhance the safety and protection of these containerized generators?

.

What is an off grid container?

Off Grid Container This is the ultimate portable power station – a 20 foot container decked out with full off grid power equipment. Includes a large Victron Quattro 10kVA inverter, 10kWh lithium batteries and 4.95kW of Solar installed on the roof with slide out & folding Solar panel mounting for easy transport and

Australian power generation container

[Aussie Built Portable Off Grid Power Container](#)

The system is fully customisable you can change the inverter size, battery capacity, and add a generator if required - let us know your requirements and we'll tailor a container to suit. ...
