

Azerbaijan cold box equipment energy storage box

Overview

What is Azerbaijan in a box?

Azerbaijan in a Box creates luxury handmade gift sets 100% made in Azerbaijan, by Azerbaijani artists. Our souvenirs will nourish the memories of your visit to Azerbaijan or introduce you to Azerbaijani culture and traditions. Our passion is to produce beautiful items which you will continue to enjoy for months and years.

What is a cold box?

Cold boxes are self-supporting structures that protect cryogenic equipment such as brazed plate-fin heat exchangers, core-in-drums, distillation columns, piping, valves and instrumentation. Our cold boxes' steel casing acts as an envelope that offers easy installation of plate-fin heat exchangers and other equipment.

How do cold boxes work?

They are fitted with a nitrogen purge system and contain stainless steel beams that support the enclosed equipment. Because our cold boxes are transported horizontally but operate in a vertical position, we also include temporary support material to protect the cryogenic equipment during transportation and throughout set-up.

How do Fives cold boxes protect cryogenic equipment?

Fives' cold boxes with integrated brazed heat exchangers protect cryogenic equipment in gas and petrochemical processing plants.
