

BESS price for photovoltaic greenhouses in Romania

Overview

Storage systems represent one of the key solutions for improving the reliability of electricity networks as there is an increase of intermittent electricity generated especially by photovoltaic (PV) systems. The cos.

Is the Bess market heating up in Romania?

The BESS market in Romania is heating up, say local analysts and insiders. Irene Mihai, policy officer at the Romanian Photovoltaic Industry Association (RPIA) recently told pv magazine that a realistic target for the utility-scale BESS segment in Romania “would be around 2 GWh (around 1 GW of installed capacity)” for 2030.

How much does a Bess project cost?

With this reopened bidding, the ministry aims to see the two-hour duration battery energy storage system (BESS) facilities up and running by mid-2026. The budget for the BESS projects is EUR 79.6 million. The call includes funding for the purchase of equipment and its installation, as well as the construction of BESS assets.

Where can I buy a Bess battery in Romania?

If the BESS may be purchased directly from the manufacturer in some countries, most manufacturers do not have retail stores in Romania. The battery is purchased from either the distributor, who can offer free shipping, or from the manufacturer with stores in other countries and adds the costs for shipping.

Are repowering and decommissioning possible in Romania?

For most of such projects, repowering is also an option. Both these two options are on the table already for projects in operation in Romania, as they are approaching the stage where either repowering or decommissioning and recycling will be required.

When will a Bess battery energy storage system be available?

The Ministry made its announcement yesterday (8 February), aiming to get the 2-hour duration battery energy storage system (BESS) facilities up and running by mid-2026. A technical guide for selection criteria has been issued, with the call including funding for purchase of equipment and its installation, as well as construction of BESS assets.
