**ESS**

## Overview

---

How much does a battery management system cost?

Active BMS also enables low-voltage charging restart once cells recover to safe zones. With enhanced capabilities over passive BMS, they suit medium-large battery capacities. Average active BMS price range: \$500-\$2,000. Hybrid BMS – As the name implies, hybrid BMS combines elements of both passive and active systems.

How much does a passive battery management system cost?

Key functions include overcharge protection, undervoltage protection, and balancing cells. Passive BMS offers adequate safety for smaller battery banks in low-budget projects. Average passive BMS price range: \$100-\$500.

How much does a BMS & PCM cost?

Its BMS & PCM maximize the safety, performance, and longevity of your lithium batteries. Its average price range is \$150-\$5,000. Renesas Electronics – Renesas has engineered award-winning BMS integrated circuits for over a decade and used top auto and tech brands. They offer both passive and active BMS. Average price range: \$150-\$1,200.
