

Battery cabinet communication high voltage control system

Overview

What is a Marquardt high voltage box?

The Marquardt High Voltage (HV) Box is a self-contained Battery Management System (BMS) designed to optimize battery performance and safety. With advanced, high-quality components, rugged durability and compact size, it's what you want to drive your next EV project.

What is a battery management controller (BMC)?

Ensure optimized, efficient battery protection and performance with the integrated Battery Management Controller (BMC) in our HV Box. It significantly extends battery lifespan, so drivers experience fewer disruptions and eliminate the cost of frequent battery replacements.

Why do you need a control cabinet?

Safeguard the performance of your grid assets. Take advantage of the breadth of our control cabinet expertise for all your electrical grid equipment. As a manufacturer of high-voltage equipment for the electrical grid, you understand the importance and challenges of monitoring, control, communication and protection.
