

# **Belarusian Communication Base Station Wind Power Company**

## Overview

---

Wind power in Belarus is a form of renewable energy, which with solar power, is one of the most important sector of renewable energy in Belarus, but remains underutilized as of 2021. As of 2019 , there is one 106 MW wind farm. New wind power is hindered by government quotas and the lack of auctions.

In a September 2022 article, the (UNDP) highlighted the country's efforts to prioritize technologies in its energy mix to.

The country has already identified 1640 points where it is possible to install wind power plants, although the wind speed over the territory of Belarus is on average no more than 3.5–5 m/s, and for.

Until the year 2010, individual units already operated in the Minsk and Grodno regions. By 2017, the largest of the wind energy facilities is Navahrudak wind park, which belongs to the RUE branch «Grodnoenergo» Lida energy networks. The first wind.
