Overview

What type of energy is used in Benin?

Like for most countries in Sub-Saharan Africa, Benin's energy sector is largely dominated by the use of biomass-based energy sources (59.4%) (Tableau de Bord de l'Energie au Bénin, 2005), followed by petroleum products (38.4%) and, to a lesser degree, electricity (2.2%).

How much does electricity cost in Benin?

The average electricity price in Benin has increased from 195.12 USD/MWh in 2022 to 200.76 USD/MWh in 2023. Since 2017, the average electricity price in Benin has fluctuated between 167.99 USD/MWh (2017) and 219.42 USD/MWh (2021). Loading.

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

How much energy is installed in Benin in 2023?

Loading. The top amount of capacity installed in Benin in 2023 was in Natural Gas at 53.72%, down from 85.81% in 2022. The technology with the biggest increase in capacity installed in 2023 was Utility-scale PV at 46.13%, up from 12.12% in 2022.

Does Benin have a large hydroelectricity potential?

While Benin has a large hydroelectricity potential only one major hydroelectric site currently functions. Development of over 80 pre-identified sites using micro-hydro applications would help Benin increase its energy resilience. The country has a huge and untapped renewable energy potential.

Is biomass a good energy source in Benin?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Benin: How much of the country's energy comes from nuclear power?

Nuclear energy – alongside renewables – is a low-carbon energy source.
