

Botswana Gravity Energy Storage Power Station

Overview

The Botswana energy storage project is quietly becoming Africa's dark horse in the clean energy race. As of March 2025, this \$120 million initiative has already deployed enough battery capacity to power 15,000 homes during peak demand.

Botswana Gravity Energy Storage Power Station

[botswana has built an energy storage power station](#)

The power station, with a 300MW system, is claimed to be the largest compressed air energy storage power station in the world, with highest efficiency and lowest unit cost as well.
