

Brazil Solar Panel Project

Product Details

Overview

In 2016, a factory capable of producing 400 MW of solar panels a year opened in Sorocaba in São Paulo, owned by Canadian Solar. A plan to build a solar panel factory in Rio Grande do Norte was announced by the Chinese manufacturer Chint in 2017. In 2020 LONGi Signs Association Agreement for 908 MW.

The total installed in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023.

In 2021, a number of photovoltaic and financial solutions companies expanded their work in Brazil. Companies such as Absolar, Insole, .

What is the biggest solar power project in Brazil?

The plant is developed by Enel. Enel through EGBP has started operating its Lapa solar park, which is the biggest solar power project operation in Brazil at present. The plant is situated in Bom Jesus da Lapa, in the north-eastern state of Bahia. Lapa project is made up of 2 plants: Lapa- with an installed capacity of 78 megawatts.

Where are solar panels made in Brazil?

Pirapora Solar Complex, one of the largest in Brazil and Latin America, with a capacity of 321 MW. In 2016, a factory capable of producing 400 MW of solar panels a year opened in Sorocaba in São Paulo, owned by Canadian Solar. A plan to build a solar panel factory in Rio Grande do Norte was announced by the Chinese manufacturer Chint in 2017.

What is the future of solar power in Brazil?

Photovoltaic power and wind power are one of the lowest-cost power generation technologies available. In the future, the Brazilian solar market is expected to grow from 37GW in 2023 to 97.46GW in 2028, with a CAGR of 23.30%.

How much solar power does Brazil have?

The total installed solar power in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW).

Are solar power plants a problem in north-eastern Brazil?

Many communities in north-eastern Brazil live close to solar power plants but lack connections to the grid, meaning they cannot access the electricity generated by such facilities (Image: Alan Santos, Palácio do Planalto, CC BY).

How much solar power does Brazil have in 2023?

In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). Brazil expects to have 1.2 million solar power generation systems in the year 2024.

Brazil Solar Panel Project

[Top five solar PV plants in operation in Brazil](#)

Listed below are the five largest active solar PV power plants by capacity in Brazil, according to GlobalData's power plants database. GlobalData uses proprietary data and ...
