

Brunei container power generation

Overview

How does Brunei generate electricity?

The power generation in Brunei primarily relies on natural gas-fired power plants, with increasing investments in renewable energy technologies. The nation's electrical grid must balance traditional fossil fuel-based generation with emerging sustainable energy sources.

Will Brunei bring new power plants online by 2027 - 2028?

To address this, the government plans to bring new power plants online by 2027-2028 using Combined Cycle Gas Turbine (CCGT) technology, pushing efficiency past 35%. Alongside infrastructure upgrades, Brunei's climate policy mandates a minimum efficiency of 48% for new plants and aims for 30% renewable energy, primarily solar, by 2035.

How many power plants are there in Brunei?

These five power plants provide about 58% of the country's electrical needs, mainly serving residential areas. The Brunei National Energy Company (BNEC) is the state-owned utility company that operates and manages the electricity supply network in the country.

How can Brunei improve energy infrastructure & renewables?

Brunei's efforts to enhance energy infrastructure and renewables are in line with the ASEAN Power Grid (APG) initiative that aims to integrate cross-border power. Other initiatives like smart metering and efficiency labeling could reduce business costs and attract investment in technology and digital infrastructure.

Does Brunei have solar energy?

In addition to solar energy, Brunei has also explored other renewable energy sources. The country has set a target of increasing the share of renewable energy in its energy mix to 30% by 2035, focusing primarily on solar energy

due to its abundance.

Why is Brunei focusing on developing downstream energy industries?

The country is focusing on developing downstream energy industries by maximising economic spin-of potential from upstream production and assets. Brunei Darussalam aims to reduce its energy intensity by 45% in 2035 from the baseline year of 2005, in line with its regional commitment to the Asia-Pacific Economic Cooperation.
