

# **Building a communication base station inverter grid-connected tax rate**

## Overview

---

What is the ITC available for a taxpayer in a tax year?

The ITC available for a taxpayer in a tax year is the ITC credit rate multiplied by the eligible basis of energy property placed in service during the tax year. Satisfies certain prevailing wage and apprenticeship requirements (“PWA requirements”).

Do utility reimbursements automatically disqualify interconnection costs for ITC eligibility?

Utility reimbursements no longer automatically disqualify interconnection costs for ITC eligibility. Instead, general income tax principles apply, offering flexibility in specific situations. Interconnection property is excluded from prevailing wage, apprenticeship, domestic content, and energy community requirements. 2.

Should mixed technology projects be exempt from aggregation?

Decline to exempt mixed technology projects (e.g., solar plus storage) from aggregation, meaning combined property must jointly meet bonus credit requirements. Clarify that a project is “placed in service” when its last energy property becomes operational. 3. The 80/20 Rule for Retrofits.

What is a New York grid integration project?

The project requires collaboration with the New York Department of Public Service, New York State Energy Research and Development Authority, New York Power Authority, and New York investor-owned utilities and provides technical expertise, research, and testing methods to address grid-integration issues in New York State.

## Building a communication base station inverter grid-connected tax

- ✓ 100KWH/215KWH
- ✓ LIQUID/AIR COOLING
- ✓ IP54/IP55
- ✓ BATTERY 6000 CYCLES
