

Can battery cabinets be added to new energy vehicles later

Overview

Do EVs have a battery enclosure?

Roughly 80% of current EVs have an aluminum battery enclosure, but engineers are quick to note that the field is wide open for alternatives, based on vehicle type, duty cycles, volumes, and cost.

Are aluminum battery enclosures a good choice?

Aluminum battery enclosures typically deliver a weight savings of 40% compared to an equivalent steel design. According to Asfeth, the alloys best suited for battery enclosures are the 6000-series Al-Si-Mg-Cu family — alloys that are also highly compatible with end-of-life recycling, he said.

What is GTR 20 eV safety?

Global Technical Regulation No. 20 on EV safety (GTR 20), which aims to protect occupants during thermal runaway for at least five minutes, has been adopted in China and is coming to Europe and elsewhere. SABIC currently produces a flame-resistant PP battery pack cover used by Honda in the China market.
