

Can the Tuvalu energy storage project be done

Overview

In 2007, Tuvalu was getting 2% of its energy from solar, through 400 small systems managed by the Tuvalu Solar Electric Co-operative Society. These were installed beginning in 1984 and, in the late 1990s, 34% of families in the outer islands had a PV system (which generally powered 1-3 lights and perhaps a few hours a day of radio use). Each of the eight islands had a medical center.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What is Tuvalu doing with the ADB?

Tuvalu, an island country midway between Hawaii and Australia, has commissioned a new solar and storage project with the ADB, featuring a 500 kW on-grid solar rooftop array and a 2 MWh BESS in the capital, Funafuti. "The project is under the Pacific Renewable Energy Investment Facility and has a \$6 million support.

What is the cost of electricity in Tuvalu?

The cost of electricity in Tuvalu is currently \$0.29/kWh for the first 50kWh (known as the 'lifeline tariff'), \$0.38/kWh for the next 50kWh, and \$0.55/kWh thereafter and for commercial and government users. The average revenue is \$0.48 per kWh. Without subsidies and using current generating systems, Tuvalu may soon have the highest energy costs in the Pacific.

What is ADB's new solar project in Tuvalu?

"The project is under the Pacific Renewable Energy Investment Facility and has a \$6 million support. It is ADB's first for Tuvalu's energy sector," the ADB said in a statement. "The project also installed solar PV in the outer islands of Nui, Nukufetau, and Nukulaelae."

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

Does Tuvalu have a sufficient infrastructure?

Tuvalu has the same basic infrastructure drivers as other countries, but due to its isolation, smallness, fragmentation, and lack of resources, its infrastructure priorities are different. Despite these challenges, Tuvalu has sufficient infrastructure drivers as compared to most other countries.

Can the Tuvalu energy storage project be done

[Tuvalu s new energy storage industry development plan](#)

The objective of the Energy Sector Development Project for Tuvalu is to enhance Tuvalu s energy security by reducing its dependence on imported fuel for power generation .
