

China Southern Power Grid Emergency Energy Storage Vehicle

Overview

Where is China's first sodium-ion battery energy storage station?

China's first major sodium-ion battery energy storage station is now online, according to state-owned utility China Southern Power Grid Energy Storage. The Fulin Sodium-ion Battery Energy Storage Station entered operation on May 11 in Nanning, the capital of the Guangxi Zhuang autonomous region in southern China.

How much energy will China Southern power grid generate?

According to China Southern Power Grid, the initial storage capacity of the station is 10MWh, with an anticipated increase to 100MWh upon project completion. The fully developed project could generate 73,000MWh of renewable energy annually, enough to meet the energy demands of 35,000 households.

How efficient is China's battery energy storage system?

In an interview with China Central Television, Gao Like, a manager at the Guangxi branch of China Southern Power Grid, said that the energy conversion efficiency of its sodium-ion battery energy storage system exceeds 92%. It's comparable to the efficiency of common lithium-ion battery storage systems, at 85-95%.
