

Communication Base Station Protection Voltage Standard Value

Overview

What is a BS type 1 Nr base station?

BS type 1-C: NR base station operating at FR1 with requirements set consisting only of conducted requirements defined at individual antenna connectors. BS type 1-H: NR base station operating at FR1 with a requirement set consisting of conducted requirements defined at individual TAB connectors and OTA requirements defined at RIB.

Which Nr test configurations should be used for other NR base stations?

For other NR base stations, the test configurations in table 4.5-1 and table 4.5-2 shall be used. The NR test configurations (NRTCx) are defined in TS 38.141-1 , subclause 4.7 for BS type 1-C and BS type 1-H and in TS 38.141-2 , subclause 4.7 for BS type 1-O and BS type 2-O.

What is a preferred power supply architecture for DSL applications?

A preferred power supply architecture for DSL applications is illustrated in Fig. 2. A push-pull converter is used to convert the 48V input voltage to +/-12V and to provide electrical isolation. Synchronous buck converters powered off of the +12V rail generate various low-voltage outputs.

What is the Test level for telecommunication ports?

The test level for telecommunication ports, intended to be connected to indoor cables (longer than 10 m) shall be 0.5 kV line to ground. In this case the total output impedance of the surge generator shall be in accordance with the basic standard IEC 61000-4-5 .

What is the Test level for AC power input ports?

The test level for AC power input ports shall be 2 kV line to ground, and 1 kV line to line, with the output impedance of the surge generator as given in IEC 61000-4-5 . In telecommunication centres 1 kV line to ground and 0.5 kV line to line shall be used.

What is a 3G base station converter?

In a 3G Base Station application, two converters are used to provide the +27V distribution bus voltage during normal conditions and power outages.

Communication Base Station Protection Voltage Standard Value

[ITU-T Rec. K.112 \(12/2015\) Lightning protection earthing ...](#)

The purpose of this Recommendation is to give detailed guidance on protection procedures, so that an engineer who is not a lightning protection expert can accomplish the design of the ...

[Product Information](#)

[Wireless Network Base Station AC and DC Power Line ...](#)

The Littelfuse high-power TVS Diode Series, including the AK, LTKAK, SMT0AK2, and SMTAK3, are specifically designed for applications that require high energy transient voltage protection.

Why does the communication base station use -48V power supply?

The voltage of +48V and -48V is equal, but the current flow is not the same. +48V flow to 0V, V0 flow to -48V. So -48V voltage is the communication power supply standards of ...

[Product Information](#)

Maintenance of communication base station power supply system

This article discusses how to improve the power supply safety of the power supply system of communication base stations, reduce the failure rate of the power supply system of ...

[Product Information](#)

[Communications System Power Supply Designs](#)

Unique solutions for DSL, VoIP and 3G Base Stations illustrate the wide range of power system architectures and the opportunities available for higher level integration.
