

# Communication distance of various base stations

## Communication distance of various base stations

---

### **Evaluated minimum safe distances for mobile-communication base stations.**

In Table 1 are presented the minimum safe distances for GSM 900, GSM 1800 and 3G base stations, in terms of public and occupational exposure.

- ✓ IP65/IP55 OUTDOOR CABINET
- ✓ WATERPROOF OUTDOOR CABINET
- ✓ 42U/27U
- ✓ OUTDOOR BATTERY CABINET

### **What Is the Role of a Base Station in Wireless Communication?**

Introduction to Base Stations in Wireless Communication Base stations are critical components in wireless communication networks, serving as the intermediary between mobile ...

## [Product Information](#)

### **Base stations**

Over large distances, the signals must be relayed by a communication network comprising base stations and often supported by a wired network. The power of a base station varies (typically ...

## [Product Information](#)

### [Movable Base Stations in Mobile Networks for Emergency ...](#)

This is because, as the user dispersion increases, the difference in distance between different users and the base station becomes larger, and thus, the throughput gap among users ...

## Reliable Communication Systems for Long-Range Drone Operations

Long-range drone operations face fundamental communication challenges: signal attenuation exceeding 120 dB at distances beyond 50 km, propagation delays ranging from ...

[Product Information](#)

## [Guide for the Selection of Communication Equipment for ...](#)

2. OVERVIEW OF COMMUNICATION SYSTEMS A communication system is made up of devices that employ one of two communication methods (wireless or wired), different types of ...

[Product Information](#)

## [Antenna Height and Communications Effectiveness](#)

The radiation elevation angle is the key factor determining effective communication distances beyond line-of-sight. Antenna height is the primary variable under control of the station builder, ...

[Product Information](#)

## [The Cellular Concept-- System Design Fundamentals](#)

Each base station is allo-cated a portion of the total number of channels available to the entire system, and nearby base stations are assigned different groups of channels so that all the ...
