

Concealed photovoltaic panels and prices

Overview

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

Which solar panels are best for RVs?

Most home solar systems use monocrystalline solar panels, but for portable applications like RVs, you may choose thin-film panels. Thin-film panels tend to cost the most in smaller sizes and the least in wide-scale industrial uses. They also perform less efficiently, but their advantage is in their lightweight design.

Are polycrystalline solar panels better than monocrystalline panels?

Polycrystalline panels were once popular but have been phased out for more efficient panels. Monocrystalline panels use a single silicone crystal, whereas polycrystalline panels use multiple crystals, which saves you money up front but doesn't perform as well. Refer to the following table to see current solar panel costs by type:
