

# **Cook Islands PV inverter voltage standard**

## Overview

---

Do I need a voltage converter in the Cook Islands?

You don't need a voltage converter on the Cook Islands. To be sure, check the label on your devices. Some devices never need a converter. If the label states 'INPUT: 100-240V, 50/60 Hz' the device can be used in every country in the world. This is common for devices with chargers like tablets/laptops, photo cameras, cell phones, toothbrushes, etc.

What type of power sockets are on the Cook Islands?

The power sockets on the Cook Islands are of type I. The standard voltage is 240 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter on the Cook Islands.

What type of power plugs are used in the Cook Islands?

On the Cook Islands, power plugs and sockets (outlets) of type I are used. The standard voltage is 240 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this page. We don't sell power plug adapters. We refer you to Amazon, where you will find a great selection of travel adapters.

Do you need a travel adapter for Cook Islands electrical outlets?

Well, the Cook Islands have Type I (i) power plugs with 240V AC 50Hz, so if your appliances don't fit the electrical outlets and/or require a different voltage or frequency, then you're going to need a travel adapter and maybe even a converter. Makes sense?

If not, this in-depth guide on the Cook Islands electrical outlet will make it so.

What is the electrical current in Rarotonga & the Cook Islands?

In Rarotonga and the Cook Islands, the electric current is 240V 50Hz. This means that the electrical current is 240 volts with 50 cycles per second. If

your country of origin uses a voltage that ranges between 220V and 240V, you will be able to use your appliances and gadgets in the Cook Islands without any problems.

Can I use a 60Hz outlet in the Cook Islands?

The Cook Islands uses a 50Hz outlet. Therefore, it is not recommended to use a 60Hz appliance, even if the voltage of your appliance is compatible with the voltage in the Cook Islands. Using the wrong frequency (which is what Hz represents) can cause appliances to malfunction or stop functioning properly. Again, check your appliance label.
