

Croatia wind solar and energy storage project construction

Overview

How can Croatia benefit from solar energy?

However, to harness this potential effectively, Croatia will need to adopt more ambitious solar energy targets, ensure clear renewable energy investment direction in the power sector, and develop its modern electricity grid. The clean energy transition and development of the solar power sector can contribute to GDP growth and new jobs creation.

How much solar power does Croatia have?

Solar is leading the new installations. The state secretary noted that in 2018, when Croatia adopted the first rulebook for the production of energy for self-consumption, there was 55 MW of solar power. Croatia has now reached 700 MW, out of which 600 MW is on the roofs of firms and homes, Milatić said.

What is Ljubovo wind farm?

This marks the company's third renewable energy project in Croatia and second wind farm in the country. With a planned capacity of 120 MW and an estimated annual production of 349 GWh, the Ljubovo wind farm will play a significant role in Croatia's energy transition. Construction is expected to begin in 2027.

How much solar power will Croatia have in 2024?

Croatia is set to put online a total of 1,200 MW in solar and wind power capacity in 2024, State Secretary in the Ministry of Economy and Sustainable Development Ivo Milatić said on the sidelines of the II Regional Conference RE-Source Croatia Hub 2024, dedicated to the development of power purchase agreements (PPAs).

Will Croatia reach its energy goal by 2028?

The country is going to reach its 2030 goal of 3.5 GW of renewables, envisaged by the energy strategy, by 2028, Milatić added. Solar is leading the

new installations. The state secretary noted that in 2018, when Croatia adopted the first rulebook for the production of energy for self-consumption, there was 55 MW of solar power.

What is DRI doing with the Ljubovo wind farm & Vedrine solar park?

In addition to the Ljubovo wind farm, DRI is advancing the Brda Umovi wind farm and Vedrine solar park in Split, Dalmatia County. The dual-phase Brda Umovi project will generate 127.5 MW in the first phase and 28.8 MW in the second, with grid connection expected in late 2026.
