

# **Current Status of Hybrid Energy for Telecommunication Base Stations in Ethiopia**

## Overview

---

How important is electricity access to Economic development in Ethiopia?

Expanding electricity access is fundamental to economic development. While the current distribution grid covers only 25% of Ethiopia's land area, 68% of the population resides less than 5 km from the grid. This highlights the potential to triple the number of household connections within the foot-print of the existing grid.

Should large-scale hydropower be deployed at multiple sites in Ethiopia?

The early deployment of large-scale hydropower at multiple sites in Ethiopia should be prioritised. Investments in hydropower serve as the key driver of electricity exports in the medium term, thereby providing a source of foreign currency.

Which countries are planning a large-scale hydropower region in Ethiopia?

However, new interconnections are planned with Eritrea (42 MW), Somalia (51 MW), Somaliland (7 MW), and Yemen (240 MW), further enhancing Ethiopia's capacity to balance power generation and supply within the region. The early deployment of large-scale hydropower at multiple sites in Ethiopia should be prioritised.

## Current Status of Hybrid Energy for Telecommunication Base Station

---

### **Solar Hybrid Base Station: Revolutionizing Off-Grid Telecommunication**

The International Energy Agency forecasts 78% of new telecom infrastructure in developing nations will adopt hybrid energy systems by 2028. But here's the kicker: Emerging ambient RF ...
