

# Czech battery energy storage

**LFP12V100**

## Overview

---

What is the largest ez battery in the Czech Republic?

CEZ Group is building the largest battery in the Czech Republic in Ostrava-Vítkovice. The capacity of the battery storage facility will be ten megawatts and the system will hold 9.45 megawatt-hours of energy, triple the current largest ČEZ battery in Tušimice in the Chomutov region.

Will a battery storage system help Czech companies achieve net zero?

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits of solar and other renewable energy sources. To do so, battery storage will be essential.

Will a house-sized battery help stabilize the Czech energy grid?

The House-sized Battery Will Help Stabilise the Czech Energy Grid \*The battery storage capacity is 10 MW and it exceeds the current largest battery in the Czech Republic by more than 40%. \*The system can hold 9.45 MWh of energy, three times the size of the ČEZ battery in Tušimice.

How will a storage system help the Czech energy sector?

The storage system will support the transformation of the Czech power sector and contribute to the stabilisation of the power grid by providing power balance services. "Europe's energy sector is changing dynamically, but a secure energy supply and network stability remain the cornerstones.

Is the Czech Republic ready for pumped-storage hydroelectric power plants?

Bulk energy storage is currently dominated by hydroelectric dams, both conventional as well as pumped. There are six localities considered for new pumped-storage hydroelectric power plants in the Czech Republic but public acceptance presents a challenge. Front-of-meter installations in the Czech

Republic are mired in regulations.

What is the jigsaw of the largest battery system in the Czech Republic?

The jigsaw from which the largest battery system in the Czech Republic is being put together symbolically fits into the gradual transformation of the Energocentrum Vítkovice site for operation in the conditions of the modern energy sector.
