

Danish electricity storage price standard

Overview

Can energy storage units be installed in the Danish power system?

Elsystemansvar A/S (subsidiary of Energinet) has asked Ea Energy Analyses to analyse the benefits and main drivers for the installation of storage units in the Danish power system. This will supplement the technology aspects in the recent Technology Catalogue on Energy Storage (DEA and Energinet, 2019).

How much does electricity cost in Denmark?

The average cost of electricity in a regular household in Denmark is approximately 3.461 DKK per kWh, whereas, for a business, the average price of electricity is 1.947 DKK per kWh. In Denmark, the price of electricity can vary from hour to hour. So, at certain times of the day, you will pay more for electricity consumption than at other times.

When will the Danish Energy Agency publish a monthly electricity supply statistics?

Since January 2000, the Danish Energy Agency has published a monthly electricity supply statistics. (Latest version: June 2025. Next version for July 2025 will be available 12 th of September 2025). Since January 2001, the Danish Energy Agency has published a monthly coal and coke supply statistics. (Latest version: June 2025).

How much does electricity cost in Denmark in 2023?

In 2023, the average total electricity price for Danish household consumers was 36.4 cEUR/kWh. It is a 30 pct. reduction, compared to 2022, when the price was 52.1 cEUR/kWh, cf. Figure 4 Source: The Danish Utility Regulator Note: The calculations are based on 4,000 kWh as an annual household consumption.

How do I find the most affordable electricity supplier in Denmark?

To find out which electricity supplier is the most affordable, you can check the

Danish Utility Regulator-operated website Elpris.dk. That will enable you to compare electricity prices across different suppliers in Denmark, which will help you find an affordable supplier. The good news is that you can change your electricity supply company.

How are energy services delivered in Denmark?

Some of the services are delivered through energy markets in Denmark (they are referenced in each of the subsections); certain are remunerated in other countries, e.g. in the US, or are not linked to any compensation at all.
