

# **Distribution of New Energy Base Stations in Georgia**

## Overview

---

How much money does Georgia spend on energy projects?

Officials on Wednesday announced \$3.46 billion for 58 projects across 44 states. Oglethorpe Power Corp., Georgia Transmission Corp., Georgia System Operations and Green Power EMC have committed to spend a total of \$507 million on the projects, including the \$250 million in federal money.

Where are battery energy storage projects popping up?

Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report. Most of the new batteries- 97% of them- ended up in ERCOT, WECC, and CAISO territories.

How much money will Georgia Transmission spend?

More than \$300 million of the \$507 million will be spent by Georgia Transmission, which transmits electricity to the cooperatives. Spokesperson Terry Buttrill said much of the money will go to build an additional 80 miles (139 kilometers) of transmission lines, reaching seven substations now served by only one line, mostly in southwest Georgia.

Will Georgia Transmission install a battery if a transmission line fails?

Georgia Transmission will also install batteries that can store electricity at six substations, an alternative way of ensuring electricity continues to flow if a transmission line fails.
