

Does the base station use batteries

Overview

Base stations typically utilize varying types of batteries, with lead-acid batteries and lithium-ion batteries emerging as the most prevalent choices. What type of batteries does the base station use?

Your SimpliSafe Base Station is fitted with NiMH rechargeable batteries, which are constantly recharging as long as the Base Station is plugged in. The base station model is SSBS3.

How do you replace a battery in a base station?

To replace batteries in a SimpliSafe base station, rotate the base counterclockwise (CCW) to remove it, then remove the batteries and replace them while ensuring the (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.

Can you put alkaline batteries in a base station?

NEVER insert regular alkaline batteries into the Base Station as they may damage the device. Plug your Base Station back into power. Was this helpful?

Does your Keypad look like the one pictured to the left?

.

How do you remove a NiMH battery from a base station?

Remove the power plug from the bottom of the base station to expose one screw. Remove the screw, rotate the base counterclockwise, and it will pull off. Remove the NiMH batteries and replace them while ensuring the correct (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.

What is the battery capacity of the SimpliSafe base station?

The batteries supplied from SimpliSafe are rated at 1000mAh capacity.

What type of batteries should I not use in my SimpliSafe base station?

Do not use Alkaline or any other non-NiMH batteries in your SimpliSafe base station. Inside the bottom of the base station are QTY (4) AA nickel-metal hydride rechargeable batteries (abbreviated NiMH or Ni-MH).

Does the base station use batteries

Save yourself some money and nerves

The base stations use about 2W of power each when turned on and have this high pitch annoying sound. 2W of power (4W for a pair) equals 35kWh of energy in a year (which equals to the ...
