

Dutch dedicated energy storage battery company

Overview

As a driver of the energy transition, RWE develops, builds and operates battery storage systems in Europe, Australia and the US. Who will build the battery energy storage system in the Netherlands?

Equans Netherlands will take charge of the engineering and construction of the battery storage system. Eneco will optimize the battery to maintain grid balance without increasing local congestion. Dispatch, a Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS).

What will Eneco do for a battery storage system?

Equans Netherlands will take charge of the engineering and construction of the battery storage system. Eneco will optimize the battery to maintain this balance without increasing local congestion. "Large-scale energy storage is the missing link in the energy transition," said Eiso Vaandrager, Co-Founder of Dispatch.

Where is a battery energy storage system located?

The battery energy storage system (BESS) will be located at the site of the former Aldel aluminium smelter in Delfzijl, Groningen province, and in proximity to a major offshore wind power production hub. The facility will be connected to TenneT's high-voltage grid through an existing substation.

What is a battery storage system & why is it important?

Construction is set to commence in the coming months and arranged in partnership with infrastructure fund EPICo², Macquarie Capital and lender ABN Amro. To fully utilise the potential of renewable energy, battery storage technology is becoming crucial for balancing supply and demand in the electricity grid.
