

EU rooftop photovoltaic panel installation

Overview

Will the EU rooftop solar standard drive more rooftop solar capacity?

According to our analysis, the EU Rooftop Solar Standard within the EPBD could drive the installation of 150 to 200 GW of additional rooftop solar capacity in the EU between 2026 and 2030. · Critically, the Solar Rooftop Standard will unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks.

What is the EU solar rooftop standard (EPBD)?

(pveurope By HCN) The newly enacted EU Solar Rooftop Standard, part of the Energy Performance of Buildings Directive (EPBD), is set to dramatically expand rooftop solar capacity across Europe. According to SolarPower Europe, this standard could drive the installation of 150 to 200 gigawatts (GW) of additional rooftop solar between 2026 and 2030.

How many GW CAN a European rooftop solar system generate?

According to SolarPower Europe, this standard could drive the installation of 150 to 200 gigawatts (GW) of additional rooftop solar between 2026 and 2030. This standard is designed to harness the substantial potential of EU rooftops, estimated at 560 GW by the EU Joint Research Centre.

Will the EU solar rooftop standard unlock the potential of large rooftops?

Critically, the EU Solar Rooftop Standard will unlock the potential of large rooftops. The Energy Performance of Buildings Directive (EPBD) officially entered into force.

How will the EU solar rooftop standard affect public buildings?

Public buildings like schools and hospitals will be particularly empowered by the EU Solar Rooftop Standard, which ensures they will benefit from solar-reduced energy expenses and dependence on fossil fuels.

When does the EU solar rooftop standard apply?

The EU Solar Rooftop Standard applies to new non-residential and public buildings from 2027, to existing non-residential buildings undergoing major renovations by 2028, to new residential buildings from 2030 and on all suitable existing public buildings by 2031.
