

# **Energy Storage Product Feasibility**

## Overview

---

What is the feasibility analysis of storage with re?

Model was developed for feasibility analysis of storage with RE. Model was analyzed in standalone and grid connected configurations. Analysis was conducted to observe the storage influences over the GHG emission, RF, COE and NPC indexes.

What is energy storage analysis?

This analysis identifies optimal storage technologies, quantifies costs, and develops strategies to maximize value from energy storage investments. Energy demand and generation profiles, including peak and off-peak periods.

What do you need to know about energy storage?

Energy demand and generation profiles, including peak and off-peak periods. Technical specifications and costs for storage technologies (e.g., lithium-ion batteries, pumped hydro, thermal storage). Current and projected costs for installation, operation, maintenance, and replacement of storage systems.

What is a good roadmap for energy storage deployment?

A roadmap for energy storage deployment with timelines and cost estimates. Technologies with low lifecycle costs and high round-trip efficiency are ideal candidates for implementation. Positive ROI and reasonable payback periods indicate financial feasibility.

What are the technical specifications and costs for storage technologies?

Technical specifications and costs for storage technologies (e.g., lithium-ion batteries, pumped hydro, thermal storage). Current and projected costs for installation, operation, maintenance, and replacement of storage systems. Expected lifespan and degradation rates of storage technologies.

How do you compare storage technologies?

Compare available storage technologies based on capacity, efficiency, discharge duration, and scalability. Estimate revenue or cost savings from storage applications (e.g., energy arbitrage, demand charge reductions). Simulate payback periods and return on investment (ROI) for different scenarios.

## Energy Storage Product Feasibility

---

### Energy storage feasibility

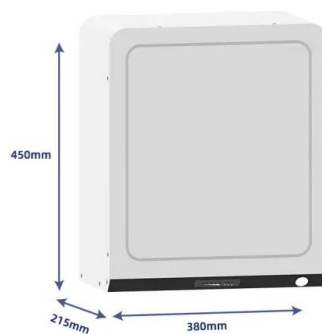

We have supported a wide variety of energy storage projects around the world through the feasibility stage, advising on technology options, business models and economic viability.
