

Energy storage battery that can be charged and discharged tens of thousands of times

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

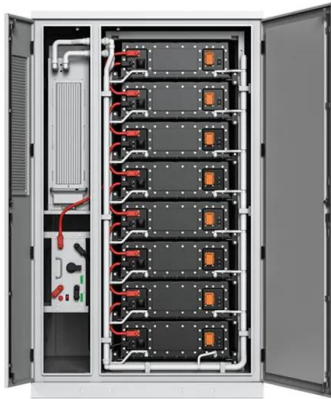

Overview

A rechargeable battery, storage battery, or secondary cell (formally a type of) is a type of which can be charged, discharged into a load, and recharged many times, as opposed to a disposable or , which is supplied fully charged and discarded after use. It is composed of one or more . The term "accumulator" is us.

A rechargeable battery, storage battery, or secondary cell (formally a type of energy accumulator) is a type of electric battery which can be charged, discharged into a load, and recharged many times, as opposed to a disposable or primary battery, which is supplied fully charged and discarded after use.
