

Energy storage cabinet battery project under construction

Overview

Who has delivered the battery energy storage project?

Audi, Etogas and MAN Energy Solutions have delivered the battery energy storage project. Additional information The Stuttgart-based plant manufacturer ETOGAS GmbH (formerly SolarFuel) has timely developed and built the world's largest power-to-gas plant. Customer and operator is the Audi AG.

What is electro-chemical battery energy storage project?

The electro-chemical battery energy storage project is a system that uses lithium-ion technology for energy storage. It was commissioned in 2018 and its key applications are renewables capacity firming and renewables energy time shift.

Are battery storage systems safe in California?

Key efforts include an update to the California Fire Code to include specific fire safety requirements for stationary lithium-ion battery storage systems, and the California Public Utilities Commission's approval of new safety standards and enhanced oversight of emergency plans for grid-scale battery energy storage systems.

Is battery storage safety a top priority in California?

As California rapidly scales up battery storage, safety remains a top priority. In 2024, Governor Newsom initiated a state-level collaborative to continue to innovate and strengthen safety standards for battery storage systems through cross-agency collaboration.
