

Energy storage power station project launched

Overview

The world's first 300-megawatt compressed air energy storage (CAES) demonstration project, "Nengchu-1," has achieved full capacity grid connection and begun generating power in Yingcheng, Central China's Hubei Province, a milestone for China's energy storage technologies.

Energy storage power station project launched

BAK Power and China Southern Grid Energy launched China's first energy

The interior of LFP system at the battery energy storage cascade utilization power station From the perspective of safety, the energy storage system put into operation adopted ...
