

Estonia household energy storage system prices

Overview

You've probably noticed the headlines: Battery energy storage system (BESS) prices in Tallinn have fallen 45% year-over-year, with recent projects hitting €0.11/Wh (\approx \$0.12/Wh). But what's driving this unprecedented price erosion?

Let's unpack the market forces reshaping Estonia's energy landscape. How much does electricity cost in Estonia?

Estonia, June 2023: The price of electricity is 0.320 U.S. Dollar per kWh for households and 0.183 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

How much energy does Estonia use?

Estonia's all-time peak consumption is 1591 MW (in 2021). In 2021 the electricity generated from renewable energy sources was 29.3 %, being 38% of the share of renewable energy in gross final energy consumption. Oil-based fuels, including oil shale and fuel oils, accounted for about 80% of domestic production in 2016.

How much does a house cost in Estonia?

There are many spas, hotels, private houses and apartments here. A modest 35 sq m apartment just 300 m away from the sea can sell for €24,000. Average prices of property in Estonia are €527 per square metre but property in the capital is more expensive. Prices in Tallinn in February 2014 rose by 17.3% with a square meter costing €1,383.

What is a residential energy storage system?

The residential energy storage system comes with a rated voltage of 48V, and an operating voltage range from 40V to 60V. It achieves a depth of discharge of 90%. Its maximum charge/discharge rate is 210A. The battery delivers more 4,000 charge-discharge cycles.
