

Features of the uninterruptible power supply energy storage cabinet in the base station room

Overview

Where should your uninterruptible power supply be located?

Your uninterruptible power supply (UPS) must be positioned somewhere safe, secure and accessible. In this article, we explore the fundamentals of UPS room layout and the things you need to consider when deciding where to locate your essential power protection systems.

What is the battery capacity of the UPS system?

The UPS system uses batteries in the battery cabinet to provide power during disruptions. The battery capacity is 34.6 kWh. The system is lithium-ion based and can support up to 5 MW in parallel.

What does a battery cabinet power?

Battery cabinets are designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet.

What is an ups & how does it work?

Designed to maximise space usage, with the UPS located in a convenient and accessible location within your building. Your UPS contains a number of VRLA or lithium-ion batteries that require maintenance and servicing to perform. The batteries in your UPS are at risk from environmental hazards, including water damage and temperature fluctuations.

How much space do you need for a battery cabinet?

For example, these codes require 3 ft. spacing on all sides of a battery cabinet, 50kWh or less cabinet capacity, and 600kWh maximum allowable quantity (MAQ) in a room. On their own, these stringent requirements would be a deal breaker for lithium.

Features of the uninterruptible power supply energy storage cabinets

Uninterruptible Power Supply (UPS) - Definition, Block Diagram, ...

A UPS or uninterruptible power supply uses batteries and supercapacitors to store electrical energy and delivers this stored electrical energy when the main input power supply fails.

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
