

# **Fiji Wind Power Energy Storage Project**

## Overview

---

How much wind power can Fiji generate?

Viti Levu and Vanua Levu are capable of generating wind power of 9 kW / m. The high energy coastlines can also be found here with similar levels to that of the southern coast of Kadavu. Reddy and Ahmed reported that Taveuni island in Fiji could generate 12 kW m – 1 wave energy monthly. 2.3. Tidal energy.

What renewable resources are available to Fiji?

The analysis of data for different sources of energy demonstrates that the potential renewable resources available to Fiji are hydropower, solar energy (photovoltaic and thermal), bioenergy, wind energy, ocean energy, tidal energy and geothermal energy.

How is energy provided in Fiji?

The provision of energy in Fiji is provided through electrical power grids consisting of microgrids installed in Government facilities and community-run in rural areas. Furthermore, diesel generators and solar home systems also are utilized as a way of power providers.

Why do we need solar power in Fiji?

By harnessing the abundant Fijian sunshine, we aim to power our pristine Fijian paradise with clean renewable solar energy for generations to come, thereby reducing Fiji's reliance on expensive and polluting diesel generation for electricity.

Will EFL install a 10 MW solar power plant in Fiji?

EFL will install a 10 MW solar power plant in Mua, Taveuni with the combined collaboration of the Ministry of Economy (MoE) of the Government of Fiji and the Korean International Corporation Agency (KOICA) representing EFL efforts to pipeline climate-resilient renewable energy in the country.

What is Fiji's offshore wave energy?

It is highlighted that offshore wave energy for Fiji is similar to that of the south of the Tonga group and slightly lower than the Southern Cook Islands. Viti Levu and Vanua Levu are capable of generating wind power of 9 kW / m.

## Fiji Wind Power Energy Storage Project

---

### FIJI RENEWABLE ENERGY INVESTMENT

The Government of Fiji is committed to the substantial legal and regulatory reforms required to bring more renewable energy into electricity generation. Examples of proposed reforms are ...
